

Antique Mowercycle

Allow me to introduce the original "chopper" model. Ah yes, there was a day when you could rake in the compliments with this cutting-edge model ... and I hear it got excellent grass mileage, too.

Someone had a great imagination (and way too much time on their hands) when they thought up this hybrid. I can just picture the inventor, mounting the mobile mower in a Bermuda shirt, feet in flip-flops, with a Panama Jack hat and a tall, cool glass of lemonade, complete with the little umbrella. Scary thought, huh?

As you venture out to do yard work this year, keep in mind that modern-day mowers are much more menacing. A slip, a trip, or a moment of misplaced concentration can result in the loss of a hand or foot. Wear the right gear and don't modify the equipment. Your "creation" just might be even more dangerous than what you started with.
