The Web-enabled safety system is the primary method for reporting aviation hazards and mishaps. WESS is an evolving program with lots of features that can make your job easier. Visit our WESS webpage to view the quick links to the online system, set up an account, and find the users' guides, training, and FAQs.

## Operational Risk Management

[www.safetycenter.navy.mil/orm/default.htm](http://www.safetycenter.navy.mil/orm/default.htm)

Operation risk management is a decision-making tool used by people at all levels to increase operational effectiveness by anticipating hazards and reducing the potential for loss, thereby increasing the probability of a successful mission. On or off duty, using the risk management process will keep you safer and ready to carry out the mission.
